

The Deryneia icon workflow to populate the KB

Prepare the input data

We started with the representation of Figure 3 (available as xmind file at [Painted Artwork \(and actors involved\) .xmind](#) and as [pdf file](#)) provided by S. Hermon, CyI.

We used a local installation of SYNTHESIS, a cultural information management system (<https://www.ics.forth.gr/is/synthesis-core>) developed by FORTH, to input as much information as possible from the xmind representation.

Installation: http://139.91.183.118:8088/synthesis_echoes/

Credentials: Username: admin

Password: admin@9803

The export of SYNTHESIS is an xml representation. The files are available in [xml-input](#).
